Meeting Location: Whatsapp Videocall

Moderator: Edvin Hysenagolli

Recorder: Megi Kongjinaj

Other Members Present: Megi Zaimaj, Brisilda Kurti, Klajdi Hoxha

Member Absent: No one

Topics Discussed:

In this meeting we discussed about the idea that we consult with the professor. After that we discussed about the technologies that should be used for this software we are going to build. We discussed about the users of our platform and also for our clients.

Decision Made:

After the discussion and the consultation with our professor, we decided to work on a system that will help National Public Bus Transportation, which will be controlled by Municipality of Tirana at first. We will use php/css/html/javascript. All data will be processed by xamp/localhost database. We do not have any kind of this system that can be public and used by all people, but we are considering of getting some information by other countries in Western Balkan about this issue. Also we decided that we should start by contacting a representative of Municipality of Tirana that covers Transportation.

Tasks Assigned

- Megi Kongjinaj will gather information about public transportation by bus from Tirana to every city in Albania. In order to know more about the role of administrators, drivers and public that uses it.
- Megi Zaimaj will check other existing systems like this in other countries, focusing in Western Balkan.
- Brisilda Kurti will check about the strongest point that this system should have, so we can work more on them and come up with more useful software.
- Klajdi hoxha will finish creating all of our accounts in GitHub and help on the research.

- **Edvin Hysenagolli will draw a sketch of our duties as long as he is the leader and search about our clients' needs.**

All together, we will analyze every information gathered. We will draw some sketches and graph of the design and decide the main users and their usage in the system.
